THINK AVIATION

01 CREW RESOURCE MANAGEMENT (CRM)

The Cost is \$200 for CRM-I (2 days) and \$100 for CRM-R (1 day)

Understanding CRM can mitigate aviation incidents. This course targets all aviation staff, covering operations and maintenance, enhancing resource management.

DANGEROUS GOODS AWARENESS (DGC/BTA)

02

The cost is \$200 for CRM-R and \$100 for CRM-I for 5 days

Comprehensive DG training is essential for mitigating aviation incidents, particularly concerning Dangerous Goods (DGC/BTA). This course is designed to educate all aviation personnel, including those involved in operations and maintenance, to improve resource management and enhance safety protocols.

03 Aviation Security Awareness (ASA)

The cost is \$ 200 for 2 days.

Aviation Security Awareness (ASA) training is crucial for enhancing safety measures within the aviation industry. This course is tailored to educate all aviation personnel, focusing on heightened awareness and vigilance to ensure security protocols are effectively implemented and maintained.

Core Instruction Techniques (CIT)

04

The cost is \$550 for 3 days

Core Instruction Techniques (CIT) training is designed to equip individuals with essential teaching skills. This course is aimed at providing comprehensive instruction to educators, focusing on fundamental techniques and methodologies for effective teaching and learning.

05 Quality Management Systems (QMS)

The cost is \$650 for 4 days.

Quality Management Systems (QMS) are paramount in ensuring consistent excellence across operations. This framework is dedicated to implementing and maintaining rigorous standards throughout all facets of an organization. It serves to optimize processes, enhance customer satisfaction, and foster continuous improvement initiatives for sustained quality excellence.

Safety Management System (SMS)

06

The cost is \$650 for 4 days

A Safety Management System (SMS) is a structured approach to managing safety risks and promoting a culture of safety within an organization. It encompasses policies, procedures, and practices aimed at identifying, assessing, and mitigating hazards to ensure the well-being of personnel and the public. SMS fosters proactive safety measures, continuous monitoring, and feedback mechanisms to continuously improve safety performance and prevent incidents within the organization.

07 Human Factors in Maintenance (HFM)

The cost is \$200 for 2 days.

Human Factors in Maintenance (HFM) addresses human performance in maintenance environments, acknowledging the impact of human capabilities and behaviors on tasks, procedures, and decision-making. It draws from psychology, ergonomics, and sociology to optimize maintenance processes, enhance safety, and minimize errors.
